MEDITERRANEAN FOOD

Natural Honey

Natural honey 10 varieties*

Honey is a very energetic food, because it has a high sugar content, between 70 and 80%.

Contains 25% fewer calories than conventional sugar (sucrose) and more sweetening power.

Honey harvested and processed in an artisan way.

We obtain honey in ten different varieties *: Thousand Flowers, Orange Blossom, Rosemary, Eucalyptus, Thyme, Acacia, Avocado, Lavender, Almond Tree and Medlar.

100% Spanish Honey.

100% Natural Product.

Presented in 250 g glass jars.

*Some varieties are not available all year round.

Natural Honey

Thousand Flowers, Orange Blossom,
Rosemary, Eucalyptus, Thyme, Acacia,
Avocado, Lavender, Almond Tree and
Medlar

10 Varieties

Lavender

Amber honey with a smooth consistency. Subtle aroma and flavor.

*It is attributed healing properties, a high regenerative factor, is used for minor burns and insect bites, bronchial conditions, flu, stomach ulcer and duodenum.***

Eucalyptus

Greenish earth-colored honey. Intense, pleasant and persistent aroma, with hints of wet wood.

*Beneficial effects are attributed to respiratory tract, in addition to acting as urinary tract disinfectant. The most tolerated honey by diabetics.***

Thyme

Dark amber honey. Intense aroma.

*It is rich in copper and boron. Promotes sleep. It is antiseptic and recommended for the prevention of infections and infectious, respiratory or digestive diseases.***

Almond Tree

Dark amber honey. Soft aroma with a bitter touch.

*It is ideal for detoxification of the body, it is recommended in cases of gallbladder problems, fatty liver, people who do not take care of their diet and suffer digestive difficulties or gas.***

Being a 100% natural honey made in a traditional way; over time it can crystallize.

This does not affect its properties or taste.

You just have to heat it in a bain-marie and it will return to its usual texture.

** Under no circumstances should the use of honey replace medications prescribed by your doctor to treat a condition. Although the effects mentioned here are widely accepted, only some of them have been corroborated by scientific studies. Always consult your GP if you have any questions. Children under 2 years old should not consume honey.

10 Varieties

Medlar

Brown honey with grayish tones. Aroma of medlar flower with fruity notes.

*For vision and skin problems (dandruff, dry and flaky skin).***

Orange Blossom

Light amber honey when liquid and yellowish-white in color and denser in texture when crystallized. Smooth aroma, very balanced.

*Due to its sedative effect, its consumption is recommended especially for people who are nervous or who are going through periods of insomnia, anxiety or stress.***

1000 Flowers

Amber honey. Intense flavor and aroma.

*From the nectar of different flowers and from them it obtains its properties. In general, it is antimicrobial and antiseptic.***

Avocado

Dark amber / black honey. Floral aroma, with hints of liquorice and caramel. Its flavor is less sweet than usual.

*Rich in organic iron, against anemia, increases the rate of hemoglobin, diuretic properties.***

Acacia

Very light amber honey. Little persistent floral aroma with farinaceous notes.

*It is an excellent option for young children, **it is not recommended for children under 2 years of age.** It is used for poor circulation and constipation. It helps in cases of insomnia, anxiety and tension, due to its sedative properties.***

Rosemary

Light amber honey. Sweet taste, with light acidic notes, floral, with camphor tones.

*For liver problems, low blood pressure, flatulence, physical and mental exhaustion. Recommended for cases of nervousness, asthma, common cough and whooping cough.***

*** Under no circumstances should the use of honey replace medications prescribed by your doctor to treat a condition. Although the effects mentioned here are widely accepted, only some of them have been corroborated by scientific studies. Always consult your GP if you have any questions. Children under 2 years old should not consume honey.*
